Education

09/2022 – Present

📖 Ho Chi Minh City University of Industry and Trade (HUIT)

- Major: *Software Engineering*.
- Relevant Courses: Web Programming (C#), .Net Technologies (C#), Database Management Systems (SQL Server), Mobile Programming (Flutter),...
- GPA: 3.19/4 (Currently: Semester 2, Year 3)

Projects

📖 IT Recommendation System (CV Analysis)

- Data preprocessing with regex.
- Evaluated ML algorithms for accuracy optimization.
- Developed intelligent job matching platform using Python/Selenium for data scraping.

📖 Flood Segmentation (UNET)

- Focused on segmenting flood-prone areas from satellite imagery.
- Implemented UNET model in PyTorch with custom loss functions.

📖 IT Recommendation System (CV Analysis)

- Data preprocessing with regex.
- Evaluated ML algorithms for accuracy optimization.
- Developed intelligent job matching platform using Python/Selenium for data scraping.

📖 IT Recommendation System (CV Analysis)

- Data preprocessing with regex.
- Evaluated ML algorithms for accuracy optimization.
- Developed intelligent job matching platform using Python/Selenium for data scraping.

Skills

Languages 📖 Strong reading, writing and speaking competencies for Vietnamese (Native), English.

Coding 📖 C#, JavaScript, C, Dart, HTML, CSS, ...

Databases 📖 SQL Server.

App Dev 📖 ReactJS, ASP.NET MVC, Winform C#.

Misc. 📖 Time management, independent working, analytical thinking, problem-solving, adaptability.
